Jethro B. Arrogante

044 San Isidro St. 3023, San Jose Del Monte, Bulacan | 09318606630 | jethroborcena@gmail.com

Passionate IT student seeking hands-on experience in an entry-level IT Support role. Combines practical knowledge in front-end design, QA testing, and software/hardware troubleshooting with custom IoT creation experience. Recognized for patience and clear communication, with a natural ability to explain technical solutions to non-technical users in an easy-to-understand way. Eager to master helpdesk workflows and contribute to a supportive IT team.

Project Experience

Port-Jeep: Integrated Web & Mobile Remittance, Scheduling, and GPS Tracking System

Mobile Front-End Developer | Mobile QA Tester | IoT Hardware Engineer

Sapang Palay Minuyan Multipurpose Cooperative | Capstone | 2026 – Present

- Engineered the native Android mobile front-end using custom layouts and dynamic adapters to provide a responsive interface for cooperative transport staff.
- Led mobile QA testing and verification, executing end-to-end test cases to optimize UI performance, fix interface bugs, and ensure stability under real-world conditions.
- Designed and built an ESP32 IoT hardware tracking unit with NEO-6M GPS and SIM800L GSM modules for real-time location tracking and automated SMS alert dispatching.
